### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference H310899PCT	FOR FURTHER ACTION	See item 4 below		
International application No. PCT/CA2004/000966	International filing date (day/month/year) 29 June 2004 (29.06.2004)	Priority date (day/month/year) 01 July 2003 (01.07.2003)		
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237				
Applicant MCMASTER UNIVERSITY				

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).		
2.	This REPORT consists of a total of 7 sheets, including this cover sheet.		
	In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead.		
3.	This report contains indications relating to the following items:		
	Box No. I	Basis of the report	
	Box No. II	Priority	
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability	
	Box No. IV	Lack of unity of invention	
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement	
	Box No. VI	Certain documents cited	
	Box No. VII	Certain defects in the international application	
	Box No. VIII	Certain observations on the international application	
4.	The International Bureau will c not, except where the applicant date (Rule 44bis .2).	ommunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority	
		Date of issuance of this report 03 January 2006 (03.01.2006)

### **PATENT COOPERATION TREATY**

From the INTERNATIONAL SEARCHING AUTH	IORITY		REC'D 1 4 JAN 2005
То:			WIST PCT
see form PCT/ISA/220		INTERNATIO	TEN OPINION OF THE NAL SEARCHING AUTHORITY PCT Rule 43 <i>bis</i> .1)
		Date of mailing (day/month/year) se	ee form PCT/ISA/210 (second sheet)
Applicant's or agent's file reference see form PCT/ISA/220		FOR FURTHER See paragraph 2 bel	
International application No. International filing date PCT/CA2004/000966 29.06.2004			Priority date (day/month/year) 01.07.2003
International Patent Classification (IPC) o C12Q1/34, C12Q1/42, C12Q1/48		and IPC	
Applicant MCMASTER UNIVERSITY			
This opinion contains indications relating to the following items:			
☐ Box No. I Basis of the o	pinion		
☐ Box No. II Priority			
		gard to novelty, invent	ive step and industrial applicability
☐ Box No. IV Lack of unity ☐ Box No. V Reasoned st applicability:		is.1(a)(i) with regard to ns supporting such sta	o novelty, inventive step or industrial atement
☐ Box No. VI Certain docu		3	
☐ Box No. VII Certain defec	ts in the international ap	plication	•
☐ Box No. VIII Certain obse	rvations on the internation	onal application	
2. FURTHER ACTION			
If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.			
If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.			
For further options, see Form	PCT/ISA/220.		
3. For further details, see notes to	Form PCT/ISA/220.

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/CA2004/000966

	Box N	o. I Basis of the opinion	
1.	With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.		
	la	nis opinion has been established on the basis of a translation from the original language into the following nguage , which is the language of a translation furnished for the purposes of international search nder Rules 12.3 and 23.1(b)).	
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:		
	a. type of material:		
	⊠	a sequence listing	
		table(s) related to the sequence listing	
	b. forn	nat of material:	
		in written format	
	$\boxtimes$	in computer readable form	
	c. time	e of filing/furnishing:	
		contained in the international application as filed.	
		filed together with the international application in computer readable form.	
	$\boxtimes$	furnished subsequently to this Authority for the purposes of search.	
3.	h C	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto as been filed or furnished, the required statements that the information in the subsequent or additional opies is identical to that in the application as filed or does not go beyond the application as filed, as oppropriate, were furnished.

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/CA2004/000966

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability			
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:			
	the entire international application,		
$\boxtimes$	claims Nos. 19		
because:			
	the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):		
	the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):		
	the claims, or said claims Nos. a could be formed.	are so	o inadequately supported by the description that no meaningful opinion
☒	no international search report has been established for the whole application or for said claims Nos. 19		
	the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:		
	the written form		has not been furnished
			does not comply with the standard
	the computer readable form		has not been furnished
			does not comply with the standard
	the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.		
	See separate sheet for further of	detail	ds

### WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

Box No. V Reasoned statement under Rule 43bis.1(a)(l) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/CA2004/000966

#### Item III

1. Claim 19 is not clear (article 6 PCT), as the enzyme inhibitor is not defined by actual, concrete technical features (such as its chemical structure) which would clearly and unambiguously characterize it, but by the method of identifying said enzyme inhibitor. Such definition might well encompass known compounds irrespective of their property of being enzyme inhibitors identified by the method of the present application, and does not allow to discriminate between novel and known compounds. Furthermore, the application discloses in a clear way no enzyme inhibitors identified with the method of the present application. For these reasons, no search and no assessment of novelty and inventive step have been carried out on claim 19.

#### Item V

- 1. Reference is made to the following documents:
  - D1: TYAGI S ET AL: "MOLECULAR BEACONS: PROBES THAT FLUORESCE UPON HYBRIDIZATION" NATURE BIOTECHNOLOGY, NATURE PUBLISHING, US, vol. 14, 1 March 1996, pages 303-308.
- 2. The subject-matter of claims 1, 3, 5, 10, 20 and 21 is not novel (article 33(2) PCT).
- a. D1 (page 305, left column, para.4-page 307, left column, para.1), representing the closest prior art, discloses a method for monitoring DNA polymerization reaction, comprising performing the reaction in presence of a signaling aptamer (molecular beacon) specifically binding to the reaction product (amplification product), and measuring the increase in fluorescence emission. The signaling aptamer does not bind to the individual nucleotides which constitute the reaction reagents, therefore it has different affinities for reagent and product as required by claim 1. Furthermore, D1 implicitly discloses a combination of nucleotides (reaction substrates), DNA polymerase (enzyme) and signaling aptamer, i.e. the components of the kits of claims 20 and 21.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/CA2004/000966

- 3. The subject-matter of claims 2, 4, 6-9 and 11-18 is novel (article 33(2) PCT), as the technical features of these claims are not disclosed by the cited prior art.
- 4. Dependent claims 2, 4 and 6-12 do not appear to be inventive: once the general concept of monitoring a chemical reaction by using signaling aptamers with different affinities for reagent and product is known, all the particular embodiments defined by such claims fall within the competence and abilities of the skilled person.
- 5. Claims 13-18 are also not inventive, as they derive from trivial modifications of the method of D1.
